

Gaskets and Gasket sets suitable for BMW N43

The BMW N43 is an inline four-cylinder gasoline engine produced from 2007 to 2013 and offered in variants such as the N43B16 and N43B20. With a displacement ranging from 1.6 to 2.0 liters, a bore of up to 84 mm, and a stroke of 90 mm, it reaches up to 125 kW (170 hp) and 210 Nm in its most powerful configuration. Technically, the N43 features a DOHC valvetrain with four valves per cylinder, intake-side VANOS camshaft adjustment, and the spray-guided High Precision Injection (HPI) direct-injection system. The aluminum crankcase with integrated cylinder liners, as well as the aluminum cylinder head, ensure low weight and high thermal stability. The N43 was used in numerous models, including the E81/E87 (116i, 118i, 120i) and the E60 520i.
